

## CAREER SUMMARY

Software Engineer with over a decade of experience designing and developing Web applications and REST APIs, proficient in **Javascript, Node.js, React, and Typescript**. I have actively participated in impactful initiatives across the Latin American region, specifically within the domains of retail and e-commerce. In pursuit of professional advancement, I am seeking a workplace that fosters continuous growth as a developer and provides opportunities to refine leadership skills.

## EXPERIENCE

### Walmart Chile S.A, Expert Full Stack developer — March 2022 - Present

- **Organized and led** a mentorship initiative to encourage teams to implement tracks to the current and incoming functionalities and serve as a bridge between the data analysis and development teams, achieving interoperability between technical and business areas.
- Serve as **Technical Lead** for building a tracking agent over the company websites using **GA** and **Google Tag Manager** to send valuable user behavior data as an +entrypoint to further analyses and projects.
- **It led a team** of five web developers to rewrite a web chatbot app into a more scalable and extensible design, migrating the chatbot engine from a third-party provider into a proprietary chatbot engine, providing the building blocks for its implementation.

**Tech Stack:** Typescript, Node.js, Next.js, React.js

### Fraccional.cl, Software Engineer — Jan 2023 - March 2024

- **Worked** with the CTO in the building blocks of the app platform and integrated several functionalities using third-party services such as mailing, payment flow, and document generation and signing.
- **Built** the main analytics dashboard and the administration site for managing the properties and supporting its customers.
- **Reached** 2MM USD in sales within the first year of operation.

**Tech Stack:** Typescript, Node.js, Next.js, React.js, Supabase, PostgreSQL.

### Mercado Libre Chile, Ltda.

#### Semi-Senior Software Engineer — August 2021 - Feb 2022

- **Developed** backend services for newcomer banks based on further refactors to the principal contracts of the Bank API architecture.
- Serve as a **mentor to development teams** from Colombia and Brazil, working on the API integration with their local banks (Itaú, BBVA, Santander, Votorantim).

**Tech Stack:** Java - SpringBoot, Apache Spark

#### Software Engineer — December 2019 - August 2021

- I was part of a team in charge of **designing and implementing** an architecture written in **Java, SpringBoot**, for integrating Banks APIs to Mercado Libre's Internal sites. The team built this initiative from ground zero to production in approximately seven months.
- **Improve the architecture** by adding abstract models to the API Core, reducing implementation times on

adding new bank APIs from other regions, such as Colombia and Brazil.

**Tech Stack:** Java - SpringBoot, Apache Spark

## Cencosud S.A, Full Stack Developer— February 2019 - November 2019

- **Created and maintained** a components library implemented within a **Next.js** site with integration with a **GraphQL API**.
- Participate in constructing a back-office system for the Jumbo fulfillment process for the online stores.

**Tech Stack:** Javascript - Next.js / React / Node.js, GraphQL

## Mediatream SPA, Full Stack Developer—May 2017 - Jan 2019

- Significantly reduced development times for incoming OTT applications **by taking part in the structural decisions** in constructing an agnostic builder written for web and mobile apps using **React.js** and **React Native**.
- I was part of the team in charge of the **construction of OTT sites** for major media companies in the LATAM region.

**Tech Stack:** Javascript - Next.js - React - Node.js - GraphQL, Mongo DB.

## Self-employed, Full Stack Developer— Nov 2015 - Jan 2017

- **Worked** as a remote freelancer developer for a Canadian contractor building a social network site, taking responsibility for implementing the web app and managing the site infrastructure.

**Tech Stack:** Javascript - AngularJS, Express - Node.js, Mongo DB.

## LCC Opentech, Backend developer— Oct 2014 - Jan 2016

- I was a backend developer for a US contractor building REST API services in Python, Ruby on Rails, and NodeJS.
- Designed, documented, and implemented guidelines for building REST API services.

**Tech Stack:** Javascript - Node.js, Python - Django REST, Ruby: Ruby on Rails.

## SKILLS

**Programming Languages:** Advanced: Javascript, Typescript; Intermediate: Java; Basic: Golang, Python.

**Frameworks Tools:** Advanced: React, Next.js, Node.js; Intermediate: Spring Boot; Basic: GA/ Google Tag Manager

**Data Base:** Advanced: Mongo DB; Intermediate: PostgreSQL, MySQL, Basic: Google Big Query

**Languages:** Intermediate: English; Native: Spanish.

## EDUCATION

- **Universidad Internacional de la Rioja (UNIR)**– Spain, *Msc. Artificial Intelligence*, Oct 2023 - Oct 2024 (Expected)
- **Universidad Católica Andres Bello** – Venezuela, *Bachelor of Informatic Engineering*, May 2017.
- **Cisco Networking Academy** Venezuela, CCNA Exploration Modules 1-4, Oct 2013 - May 2014.
